

IN THE ABSTRACT:

Please amend the Abstract as follows:

--Abstract of the Disclosure

A method of forming a menu on a display of an electronic device, ~~which menu comprises~~ is shown with at least two function elements (1) for selecting functions. ~~The method comprises the steps of~~
[[-]] ~~defining at~~ At least three display areas (A, B, C) that are defined substantially adjacent to each other in a first direction;
[[-]] ~~defining at~~ At least a first identification part (2) and a second identification part (3) ~~that are~~ defined as contained in the function elements (1);
[[-]] ~~displaying the~~ The first identification part (2) of ~~the~~ a function element (1) in ~~said~~ the first direction is displayed on the outermost display areas (A, C), and
[[-]] ~~displaying the~~ the second identification part (3) of the function elements (1) on at least one display area (B) between ~~said~~ the outermost display areas (A, C) is displayed in such a manner that the second identification part of the first function element and the second identification part of the second function element are positioned at least substantially next to each other in a second direction substantially perpendicular to said first direction.
~~The invention also relates to~~ Also shown are a graphical user interface (GUI), a device, a system, a software program and to a storage medium.
